

Wheelchair OPTIONS & ACCESSORIES

Not all options & accessories available on all models. Please check the individual chair or order form.

Pelvic POSITIONING

3-Pt Positioning Belt with Depth Adjustable Crotch Strap

Helps position user's pelvis properly and prevents submarining out of the chair.

Heavy-Duty Reinforced Upholstery

Provides extra firmness when required. Reinforced padded seat and back is fitted with removable ABS stiffeners.

CUSHIONS

Position Cushion: Medial Thigh Support and Anti-Thrust Cushion

Medial thigh support helps to position the legs out of abduction and into medial alignment to improve weight bearing and maximize loading contact surface area.

Align Cushion: Lateral Pelvis and Lateral Thigh Support Cushion

Contoured edges provide lateral pelvic stability and thigh positioning to reduce lateral movement of the pelvis and improve lower extremity stability.

Support Cushion General Use Cushion

The basic soft foam base provides support and increased tolerance to aid in user's comfort.

Transit OPTIONS

5-Point Harness

The crash tested (SAE J2249) 5-point harness will keep small children safer in their wheelchairs while riding in a bus or van. This harness is for children who weigh under 65 pounds. This harness secures the occupant directly to the chair, providing a closer fit.

Transit Lap Belt

The crash tested (SAE J2249) transit lap belt provides additional occupant safety when riding in a bus or van. The belt connects to the bus anchored shoulder restraint harness, and is used in addition to the pelvic positioning belt.

Head SUPPORTS

Headrest Extensions

Extends back height to provide head support for taller individuals. Used on bus transport models to help prevent head whiplash during a rear-end collision.

Padded Headwings

Height adjustable headwings provide soft foam lateral support for midline positioning of the head. May require headrest extension on some models.

Occi Headwings

Provides sub-occipital support to help position the head midline. Provides added comfort, allows side to side head movement without obstruction, and does not block the individual's ears or line of vision.

Foot & Leg POSITIONING

Foot Positioners

Adjustable Velcro® straps help position the feet properly on footplates, thus maximizes loading contact area and proper foot alignment. Straps can be positioned to attach around the ankle or cross over the foot.

Angle Adjustable Footplates

Footplate's angle is adjustable to accommodate dorsal/plantar extensions/contractors to provide proper foot positioning and alignment. Can be adjusted frontward, backward, or sideways, and can be rotated vertically.

Footplate Securement Strap

Strap secures the individual footplates together to prevent them from flipping up, especially helpful for individuals with high tone.

Calf Panel

Provides support to the lower legs to give additional support, pressure relief, and comfort. Especially helpful when the chair is in a tilted or recline position.

Medial Thigh Support (Abductor)

Separates thighs to improve hip alignment and stabilizing sitting posture. Degree of abduction can be adjusted and accommodate postural asymmetry.

Lateral Thigh Support (Adductor)

Pulls thighs together to improve hip alignment and stabilizing sitting posture. Degree of adduction can be adjusted and accommodate postural asymmetry.

Elevating Legrest with Swing-Away Footplates

The angle adjustable legrest accommodates patients with limited knee range of motion and with high tone. Also helps prevent edema of the lower extremities. Adjustable footplates swing-away for easy access in and out of chair.

Legrest Extension

Extend the length of the legrest to properly position a taller occupant. Extends an additional 2" to 3" depending on the model of wheelchair.

Frame OPTIONS

Extended Handles

Extended push handles add an additional 4" in height, and are ideal for a tall caregiver.

Height Adjustable Flip-Up Armrests

Provide upper extremity support and positioning. Armrests "flip-up" out of the way for easy access into chair.

Anatomic Back

Provides increased lumbar support, which helps stabilize the upper torso, neck and head to assist the development of righting reflexes. Nylon positioning spines are inserted into the heavy-duty fabric back to provide additional structural support and easily slide out for custom forming with a heat gun.

Frame OPTIONS

(Continued)

Two Piece Push Handle

Traditional push handle is easy to push using both hands while maintaining a secure hold on the chair.

One Piece Push Handle

Provides easy height adjustment for caregivers of any height. It adjusts with a simple push of a button to have a comfortable, functional, and safe grip of the chair.

Recline Option

Opens the seat-to-back angle by 20° for improved respiration, pressure relief, and digestion.

Side Panels - Mesh

Side panels provide additional upper body positioning and support and provides additional security to prevent the child from leaning out the sides of the seat. Mesh fabric allows for increased airflow and circulation.

Side Panels - Solid

Side panels provide additional upper body positioning and support and provide additional security to prevent the child from leaning out the sides of the seat.

Trrunk POSITIONING

Soft Adjustable Lateral Support- Single Flap

Lateral support stabilizes trunk and maintains midline positioning. Includes a chest strap that can be pulled to one side for additional scoliosis correction. Adjustable and detachable.

Soft Adjustable Lateral Support- Double Flap

Lateral support stabilizes trunk, provides additional structural support laterally, and maintains midline positioning. Includes a chest strap that can be pulled to one side for additional scoliosis correction. Adjustable and detachable.

Lateral Trunk Support - Flat and Contoured

Designed to provide solid midline positioning of the trunk. Includes fixed hardware; swing away hardware is available as an option.

Torso Support Vest

Utilize the support vest when aggressive trunk support is needed. The vest keeps the individual in place comfortably and securely. It maintains correct midline upper body position, prevents forward slumping and assists shoulder retraction. Adjustable and detachable. Available in various sizes.

H-Harness with Padded Covers

Provides the occupant with anterior trunk support to maintain upper body trunk positioning and prevent upper body fatigue. Includes padded covers for additional comfort.

Reducer Seat Insert

Provides proper positioning in an oversized wheelchair to maximize growth potential. The insert easily slips into the seat of the chair to reduce the seat width 2" and the seat depth 1". The ribbed surface provides comfort and promotes airflow.

Wheelchair

ACCESSORIES

Upper Extremity Support Surface (Clear Tray)

The tray provides upper extremity support and positioning to maximize upper extremity function for communication, therapeutic intervention, and educational activities. Depending on model chair, it can be height and depth adjustable.

Under Seat Storage Basket

The storage basket is the perfect place to stow essential medical items - such as a suction device. Maximum weight limit varies by model.

Medical Necessity Storage Basket

Designed to hold large support equipment such as ventilators, external batteries, IV pumps, suction pumps, or other medical disposables. Weight capacity of up to 50lbs.

Travel Bag

This wheeled travel bag is great for transporting your chair on planes, trains or buses. Constructed of heavy duty Cordura fabric, it comes with two-way zippers, pull handles at both ends and an adjustable carrying strap. One size fits most chairs. Available in black only.

Attendant Hand Brakes

Provides controlled and safe mobility in environments with uphill or downhill inclines. The hand brake is in addition to the wheel lock.

Rear Anti-tip Tubes

Provides additional safety to prevent chair from tipping backwards when weight is unevenly distributed.

Saddle Bags

Attaches to the side of the chair, and are perfect for storing smaller, medically necessary items.

Utility Bag

Perfect for storing essential medical supplies and disposable items. Easily detaches from the chair and when removed, converts to a convenient tote.

Caster Locks

Hold the swivel wheels in a forward facing position to prevent the wheels from turning side to side. (For 2" wide wheels only)

Oxygen Tank Holder

The oxygen tank holder holds a size D (4") diameter tank. Clasps hold the tank away from the chair back, and the strap at the base adjusts to stay taut when the chair is tilted. Made from Cordura.

Headrest Cover (Canopy)

Provides protection from sunlight and the environment. For patients that have skin sensitivity to sunlight due to clinical condition or prescription medication, it provides the added level of protection against sunburns and skin damage.

Curb Tipper

Provides a leverage point to elevate the front of the chair to easily go up curbs.
